DETAILED ACTION

In response to the Restriction Requirement, the applicants have elected claims 16-19, 27-39 for being examined; therefore, claims 20-26 are withdrawn from consideration.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim 16 is rejected under the judicially created doctrine of double patenting over claim 9 of U. S. Patent No. US 6050671 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

Allowable Subject Matter

Claims 27-39 are allowed and Claims 17-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Referring to claims 17, 19, 27, 36: The most pertinent references Osborne et al. (US 5712668) and Cameron et al. (US 5563639) fail to disclose a catch basin joining together the lower edge each side wall to form a liquid containing structure, with the catch basin comprising a bottom wall and at least one tapered wall extending upwardly and outwardly from the bottom wall to join the lower edge of one of said plural side walls.

Referring to claim 18, 31: The most pertinent references Osborne et al. (US 5712668) and Cameron et al. (US 5563639) fail to disclose an ink transfer structure extending from the ink spit receiving structure to the ink accumulating structure, comprising side walls which taper downwardly and inwardly from the mouth to join the bottom wall.

Claims 28-30, 32-35, 37-39 are allowed because they depend directly/indirectly on claim 27, 31, or 36.
